Git/SVN, MySQL,
ORMLite, JUnit,
myPHPAdmin, JIRA,
LaTeX

education

2010 – 2013 **Bachelor** of Computer Science   The University of Nottingham, Nottingham
An Application Approach To Mobile Signal Analysis
My dissertation focused primarily on the Android platform and used Java to create a mobile application to access real time information about mobile signal speed and strength. This project earned a first class mark and enabled me to use common workplace practises such as test driven development and agile software methodologies.
Overall, I graduated with a Second Class Degree (Upper Tier).

2008 – 2010 **Sixth Form**   Lord Williams's School, Thame
A Levels: ICT (A), Physics (B), Maths (C) and AS Geography (C)

experience

2015 – **HI MUM! SAID DAD**   London, United Kingdom
Android Developer
In-house Android developer for Hi Mum! Said Dad, a multi-award winning mobile design agency with a high number of 'household name' clients.
Detailed achievements & responsibilities:

- Working on large scale and highly popular applications - e.g. Tastecard, Breathesport, Carling iPint etc.
  - Providing support for the entire product life cycle from conception to release and beyond
  - Using industry standard Android tools such as Google Analytics, Urban Airship and Crashlytics to provide internal and client based reports
  - Using issue tracking software (JIRA) to report defects, log work and current sprints
- Closely working with a UI/UX design team to develop intuitive and visually stunning applications using the latest design guidelines (Material Design)
- Providing documentation and support for multiple systems
- Communicating closely with both in-house and remote working developers
- Working with a large team of professionals using an agile methodology

2013 – 2015	**BOPPL LTD**	London, United Kingdom

Android Developer

Sole Android developer for Boppl, a mobile ordering platform and application used within the hospitality industry, that allows users to purchase food and drink at selected venues.

Detailed achievements & responsibilities:

- Creating and maintaining bespoke Android applications from scratch
  - Released and managed multiple applications to the Google Play Store
  - Using standard Android tools such as DDMS and adb to debug code
- Learned how to work with common external libraries such as GSON & ORMLite
- Used version control (git) effectively
- Worked with JSON and a RESTful API
- Working with a small team of professionals

2012 – 2013	**ED GEORGE DESIGNS**	Oxford, United Kingdom

Web Designer & Founder

Founded a small web design business creating and maintaining tailored websites for multiple clients.

- Conducting professional client interviews and requirement specifications
- Providing professional standard documentation
- Working with a variety of Content Management Systems, Programming and Markup Languages

awards

2010	**Nick Nichols ICT Award**	Lord Williams's School

2006 – 2009	**Member of Gifted & Talented UK**	Lord Williams's School

2012	**Nominated for 'Outstanding Contribution to a Society'**	Nottingham University

Nominated for contributions to CompSoc

leadership activities

2011 – 2012	**Social Secretary - Computer Society**	University of Nottingham

Responsible for the organization of trips/socials for the society. Including a trip to CeBit Hanover, Germany for 35+ students. Also responsible for organization of sponsor talks and other society duties.

2012 – 2013	**3rd Year Course Rep**	University of Nottingham

Responsible for guiding potential candidates around campus and the department, answering questions and meeting Parent/Student requests. Also required as a liaison to the Department with feedback from Parents/Potential Students

2012 – 2013	**UCAS Tour Guide**	University of Nottingham

Responsible for attending Learning Forums and for voicing concerns from my peers to Academic Staff.
